Abstract (en)
[origin: EP0698359A1] The chair has short legs and the seat-surface (1) is raised on both sides (3,3') and if necessary at the front. The front is widened. The armchair is adapted to the sitter's body-shape. The back of the seat surface has a raised part (4) in the middle, forming an extension to the sitter's coccyx. The back-rest (2) has an outward bulge (5) positioned near the sitter's fourth and fifth lumbar vertebra. The seat surface may also have inward bulges near the two cheeks of the sitter's bottom.
