Abstract (en)

The cover (6) is surrounded by a supporting frame (4) with guide rails (8) along two opposite side walls. The cover has upper (58) and lower (56) lugs on each side to engage with the guide rails, mounted on supporting legs (52) extending from the cover's lower surface and perpendicular to it. Each leg has a flat section (59) which prevents any pivoting of the cover as it is raised or closed. Each guide rail has a rear section (28C) which frees the cover, while each of the frame's opposite side walls has a locking rib (36) which is situated at least partially above the upper lug forming a chicane for the lugs to pass through.

Abstract (fr)

La trappe, comporte un cadre (4) de support délimitant un passage (16) et un couvercle (6) d'obturation amovible. Le cadre (4) comporte en outre un rail de guidage (28) sur chacune des deux parois latérales (10), et le couvercle (6) comporte latéralement de chaque côté, deux patins (56,58) de suivi du rail de guidage (28) dont un patin supérieur (58) glissant sur la face supérieure du rail lors des mouvements d'ouverture par glissement vers l'avant et de fermeture par glissement vers l'arrière du couvercle (6) et un patin inférieur (56) adapté pour buter sur la face inférieure du rail en cas de soulèvement du couvercle (6) en position d'ouverture au moins partielle de celui-ci. Application aux bouches d'incendie ou à la voirie. <IMAGE>
