Abstract (en)

[origin: EP0698697A2] Arrangement for the waterproofing of joints between an existing structure, esp. a steel wall and an extension in concrete comprises: (a) a flexible sealing strip (1) having: (b) a compression section (2), and (c) a connecting section (3). A device (20) provides the means to press strip section (2) against the existing structure (30). Also claimed is the sealing process achieved by this method.
