Abstract (en)

[origin: WO9525360A1] A cable clamp includes first and second jaws secured together by a fastener to clamp a cable therebetween. A shield member is mounted to the longer of the jaws, adjacent to the shorter of the jaws, and a moisture resistant cover is sealed to the shield member, around the shorter jaw and to a clamped cable. The fastener includes a boss with a threaded opening on one of the jaws, which boss is received by an opening in the other of the jaws. A bolt engages the threaded opening to clamp the jaws on the cable.
