Abstract (en)  
A continuous abrasive belt 31 for a power file or the like, wherein the belt 31 has a substantially constant thickness throughout. The belt 31 is ideally seamless, being formed from a tube of backing material coated with adhesive and abrasive particles and cut to length. As a result of being seamless, and hence jointless, failure of the belt 31 during use is less likely and "bumping" of the workpiece does not occur. <MATH>
