Abstract (en)
The robust case has the bottom, end pieces (B) and the bottom parts (U) of the main sides of double skinned plastics produced by injection moulding. The separate sections are joined by moulded plastics hinges to enable all the plastics to be moulded in one operation. The plastics sections are folded into position about the plastics hinges and secured by adhesive, welding or by use of fasteners. The remainder of the case is attached to the plastics base section. The fittings include inner dividers, secured between guide slots, to further reinforce the case. The underside can have integral reinforcing rails. At least one of the end pieces has recessed labelling sectors and the main side walls are hinged on the bottom section to fold outwards for access, with straps to limit their extension.

Abstract (de)
Bei einer Tragetasche, insbesondere einer Werkzeugtasche, mit einem Boden, an dem Seiten- und Stirnwände befestigt sind, wobei der Boden, die Stirnwände und die Unterteile der längsseitigen Seitenwände zu einem trogförmigen, starren Grundkörper verbunden sind, ist der Grundkörper (G) ein einstückiges Kunststoff-Blasformteil (C), in dem der Boden (B), die Seitenwand-Unterteile (U) und die Stirnwände (T) doppelwandig ausgebildet sind, wobei jedes Unterteil (U) und jede Stirnwand (T) über ein Filmscharnier (16) mit dem Boden (B) verbunden ist. <IMAGE>
