Abstract (en)
[origin: EP0700816A1] The twin track conveyor consists of a carriage line (10), with two drive circuits set at a distance from the carriage line vertically, and carrying propulsion elements in the form of pushers (34). Each carriage has a structure (36) with a drive having two fixed lateral arms (46,48), each with an active face (46a,48a) situated in the same plane as the drive face (40a) on a bracket extending from a propulsion element. The drive face of the bracket (40) and the active faces of the lateral arms are inclined towards the drive circuits.
