Abstract (en)

The stocking is made from two filaments - polyamide and elasthane, formed into linked loops in a single weaving operation without the use of special chemicals. The two filaments are joined together in double loops, with the elasthane tending to draw the loops together. The resulting material is more compact and supple to the touch.

Abstract (fr)

Un tricot indémaillable présente des rangées de mailles tricotées d'un fil unique et des rangées de mailles vanisées. Une structure de losanges est obtenue par l'application de mailles chargées. <IMAGE>
