Abstract (en)

[origin: EP0701227A1] The system provides a receipt for the posted item using a video camera (38) positioned above the item reception point and an electrophotographic printer (40) for recording an image of the scanned item or the scanned item address on the receipt. Pref. a pattern recognition system is used to isolate the area of the image provided by the camera holding the address data, the obtained data pref. provided on a display for verification by the user before the receipt is printed.
