Abstract (en)

[origin: EP0701304A2] A socket outlet, for multi-pole (pin) plug connection, including several contacts (40) received in apertures of a contact carrier (10), and in which a mechanically movable interrupter (52) is provided in order to break an electrical connection with a current consumer. To provide functionally reliably actuating interrupters, the interrupter (52) is arranged inside the contact carrier (10) and resides in active connection with a contact (40) in such a manner that the interrupter (52) is mechanically moved by a contact pin (80) pushed into this contact (40).
