Abstract (en)
[origin: WO9429508A1] A laundry bag is made of at least one length of fabric with loosely overlapping walls on one side. In order to create a considerably humidity-tight laundry bag in as simple a manner as possible, which may also be used for collecting wet textiles, the bottom (8) of the laundry bag is formed by an additional length of fabric (9) secured all around (7) the lower edge of the bag walls (1, 2) and which forms a seamless reception cavity below its fixation line (7).
