Abstract (en)
[origin: WO9523994A1] An information display apparatus integrated into a pair of eyeglasses provides visual information to the eyeglass wearer. The apparatus includes a display device (150) having image plane (152) and a focusing lens (160). The focusing lens (160) in conjunction with a flat mirror (170) and angled mirrors (180) operates to focus the image plane object of the display device (150) to the user's eye.
