Abstract (en)

[origin: EP0701785A1] The make-up packaging comprises a reservoir body (1) and two applicators (2,3) each comprising a rod (4,15) having at one end an applicator brush (5,16) for the product. Fixed to the other end of each rod is a gripping cap (6,17). The rod (4) of the first applicator (2) is hollow in a part of its length to define an axial channel (13) in which is housed the applicator brush (16) and the rod (15) of the second applicator (3). The wall of the rod of the first applicator has a slot (14) communicating with its axial channel and the interior volume of the reservoir body. The gripping cap (17) of the second applicator is connected to the gripping cap (6) of the first applicator. The slot is at the level of the applicator brush of the second applicator in its engaged position in the first applicator.
