Abstract (en)
The compound insulation material, for thermal and acoustic insulation, has a plate of hard plastics foam and a plate of plaster cardboard, with a layer of flexible and open-cell foam between them. The intermediate layer is a duromeric foam of melamine/formaldehyde resin. The ratio of the thicknesses of the hard foam layer and the intermediate layer is 10:1 to 1:10.

Abstract (de)
Die Erfindung betrifft ein wärme- und schalldämmendes Verbundelement aus einer Platte aus Kunststoff-Hartschaum (3) und einer Gipskarton-Platte (5), zwischen denen eine Schicht aus einem flexiblen, offenzelligen Duromerschaumstoff (4) angeordnet ist.
