Abstract (en)  
The unit consists of two telescopically-linked hollow metal panels (14,15), equipped with hooks (17) for fastening the unit to parallel supporting members (12). The outer transverse edges of the outer metal panel have a tongue on one side and a groove on the other for engaging with adjacent units. The tongues have up-turned outer edges, and the grooves are made with corresponding recesses. Both panels have ribbed upper surfaces and holes in their sides for locking pins; they are made from aluminium or an aluminium alloy. The end hooks (17) are equipped with spring-loaded retaining jaws.

Abstract (fr)  
Il s'agit d'un élément de plancher (11) à rapporter transversalement sur deux organes de soutien (12) pour la constitution d'un platelage (10). Suivant l'invention, cet élément de plancher (11) est formé de deux tronçons de profilé (14, 15), qui sont engagés l'un dans l'autre de manière télescopique, et dont chacun forme intérieurement au moins une case à la faveur de laquelle est rapporté un embout de support (17) propre à porter sur l'un des organes de soutien (12). Application à la constitution d'un platelage pour un échafaudage. <IMAGE>
