Abstract (en)

[origin: WO9429268A1] The invention concerns propargyl carbamates of formula (I) in which R<1> and R<2>, independently of each other, are hydrogen, alkyl or phenyl, or R<1> and R<2> together form a 5- to 8-membered ring, and R<3> and R<4>, independently of each other, are alkyl (which may optionally have 1 to 3 oxygen, sulphur or nitrogen atoms in the carbon chain and/or may optionally be substituted) or optionally substituted aryl or aralkyl, or R<3> and R<4>, together with the nitrogen atom to which they are bound, form an optionally substituted 5- to 8-membered ring which may optionally include 1 to 3 oxygen, sulphur and/or nitrogen atoms in the ring and/or may optionally be benzoanellated. The invention also concerns a method of preparing them and their use as biocides in the protection of plants and materials.
