Abstract (en)

[origin: EP0702915A2] The front panel (4) of the drawer is attached to two rear mounting brackets (7) by threaded fasteners. Each bracket is clipped to an intermediate mounting element (8) which incorporates screw adjustment for vertical alignments. The mounting can swivel about a vertical axis. The intermediate mounting element is clamped to the support bracket (6) which supports the side of the drawer on the drawer rail. The vertical adjusting screw (17) adjusts the relative setting of the intermediate mounting element on the drawer structure. The swivel adjuster (14) is set through the mounting element and swivels it to either side.
