Abstract (en)  
[origin: EP0702916A2] The drawer comprises a plastics moulded shell with outer edges hollow, open to the bottom. The drawer runs on support rails (2) under each side and with front (6) and rear (7) support brackets attached to the upper rail on each rail pair. The supports are shaped to enable the drawer moulding to be dropped over the supports. The support brackets have ratchet grips to clip to the rails. The front panel is secured to the rails as well as to the support brackets for a simple assembly. All the components are made of plastics and the top edges of the drawers have fittings for railings to enable large items to be stored.
