Abstract (en)

The pallet has grooves (3) and ribs (2,4) allowing the insertion of supporting or separating bars. The grooves and ribs at one supporting side (A) of the pallet (1) can be at right angles to those at the other (B). Where the ribs are parallel to the shorter side of the pallet, they can be interrupted by lengthwise grooves (5) at right angles to them and parallel to the longer sides. There can be two such lengthwise grooves, situated symmetrically in relation to the side edges.

Abstract (de)

Eine Spezialpalette 1 zum Transport von Bogenstapeln in automatisierten bogenverarbeitenden Systemen weist auf beiden Tragseiten Stege 2, 4 auf, in deren Zwischenräume Trag- bzw. Trennstäbe eingeschoben werden können. Die Stege 2, 4 können auf den beiden Tragseiten um 90 Grad zueinander versetzt und in Querrichtung durch Nuten unterbrochen sein. <IMAGE>
