Abstract (en)

[origin: EP0704766A1] Transparent elements for use in electrostatic copiers comprise: (1) a composite polyester support (S) comprising: (a) a relatively thick layer (A) of semi-crystalline polyester; and (b) on face(s) of the layer (A), a thin layer (B) of a polyester that is the same or different to the polyester constituting layer (A); and (2) a primer coating (P) less than or equal to 0.3  $\mu$ m thick on the face(s) of the support to promote adhesion of the toner to the support, comprising an acrylic polymer having a glass transition temp. T<sub>g</sub> of 10-50 degrees C., a content of free-COOH functions of less than 50 millimoles per 100 g acrylic polymer.
