Abstract (en)  
[origin: WO9500627A1] Described are washing agents which possess decolorization-inhibiting properties without the need for the addition of one of the usual colour-transfer inhibitors such as PVP. These properties are due to the fact that the agents contain 10 to 30 % by wt. of non-ionic surfactants, 0 to 10 % by wt. of anionic surfactants, 1 to 6 % by wt. of fatty-acid soaps and 20 to 60 % by wt. of builders selected from the group comprising zeolites (anhydrous active substances) and phyllosilicates.
