Abstract (en)

[origin: EP0705928A1] A trolley for changing a loom harness has a travelling frame with a device for introducing the warp beam and a framework with a horizontally and vertically adjustable support on which are mounted equipment for the introduction of the warp thread monitor and the heddle shafts where the last equipment has two devices for capturing and two fingers for release or acceptance of the heddle shafts. Here, the equipment for introducing the heddle shafts is arranged to be able to rotate about an axis (17) on the framework.
