Abstract (en)
[origin: EP0705980A1] The connecting component (11) is connected to the pump (10) and in it is at least one channel (31,32) for a pressure medium. The connecting component channel connects the pump with a hydraulic system. The connecting component is of plastics and in it is formed at least one recess (26,27), in which is an insert part (28,29) with the channel for the pressure medium. The insert part is of metal, is tubular and is sealed to the connecting component by sealing components (33). The connecting component on the opposite side (22) to the pump is connected to a drive motor.
