Abstract (en)
The present invention relates to a door (10) for commercial furniture, characterized in that it comprises a folded metallic front plate (12), a folded metallic rear plate (13), and a frame (14,15) made of plastics. The front and rear plates (12,13) constitute, in association with the frame (14,15), the box-like body (11) of the door, which can be filled with thermally insulating material such as foamed polyurethane or the like. Respective lugs (28) extend monolithically from two corner regions (22,23) of the frame (14,15) that are arranged at the ends of a common edge, each lug (28) forming the male or female component of an external back hinge. <IMAGE>
