Abstract (en)  
[origin: WO9421284A1] The invention provides a method of treatment or prevention of gastrointestinal disease in an animal, comprising the step of administering to an animal in need of such treatment an effective amount of an antibody which has been pretreated with a proteolytic enzyme, or of a proteolytic enzyme together with an effective amount of an antibody, optionally in conjunction with a probiotic organism, wherein the antibody has specificity against an organism capable of causing gastrointestinal disease. Preferably the antibody is derived from colostrum. The invention also provides compositions for use in the method.
