Abstract (en)
[origin: DE4320907C1] In a clip device having two clip legs (1, 2) connected via a spine (3), one (1) of the two clip legs (1, 2) consists of two sections (1a, 1b), which are connected to each other via a hinge (4). The section (1a) of one clip leg (1) facing the spine (3) has a clip ram (8), whose free end (11) is curved in an arcuate manner and forms a sliding runner which permits the easy transfer of the clip ram (8) out of its initial position into a clipping position. <IMAGE>
