Abstract (en)

[origin: WO9501911A1] The invention relates to a device for filling reclosable containers, such as bottles or jars, with liquids, pastes or free-flowing solids. The filling device proposed has a container-selection station (21) connected by a container-transfer device to a filling station (10) where the containers are filled with a selected product. Following closure, the filled containers are transferred to a collecting station (15) from where they can be removed.
