Abstract (en)
[origin: EP0706775A1] The support (1) has a groove (2) accommodating scraper-pile or bristle strips. Two parallel sides (4,5) form the groove, one of them being higher than the other. The groove can be of T-section, and the higher side (5) can have grooves at the top edge. One or more additional grooves can be provided parallel to the first one and accommodating additional bristle strips. The side height of the additional grooves can be equal to or less than that of the lower side (4) of the first groove. Supports can be joined together by elastic connectors.
