Abstract (en)
[origin: EP0706950A1] The lid (1) has a peripheral skirt (2) to cover the open top of the container, and a gripping tongue (7) fixed to the edge of the skirt. The tongue has a shape and volume such that its intersection with the skirt is a curve with its centre at a height corresponding to at least 3 times the thickness of the tongue, and is joined to the lower edge of the skirt on either side of its centre. The lid can be made from polypropylene or polystyrene and is suitable, e.g. for pots containing dairy products.
