Abstract (en)
[origin: EP0707116A1] In the push tube (c) of the departure stop in the lower area a guide (i) with at least one securing component (j) displaceable in a direction crossways to the movement direction of the push tube is provided. In the ground tube (a) at least one securing possibility (1) for the at least one securing component in the high drawn position of the push tube is provided. A form part (h) is provided, which sets under pressure the at least one securing component in the cross direction. This form part is connected via a flexible connection (g) with an externally operable part (d,f) within the push tube.
