Abstract (en)
[origin: EP0707125A2] In the rear wall area of the drawer on the cabinet construction (40) is a bolt lock (38) in which the bolt in the closed position of the drawer engages. Two bolts commonly operable by the operating mechanism (14) and a bolt lock for accommodation of the securing nose formations (36) of both bolts are provided. Both bolts are operable in opposite directions. The bolts are formed as L-shaped elbow, levers, on the first ends of which the operating mechanism engages and their second ends have a securing nose formation for engagement in the bolt lock. Both bolts are tensioned in their closed position by a spring device (32).
