Abstract (en)

[origin: WO9426246A1] Denture cleansing tablet comprising visually discrete agglomerated particles of an organic peroxyacid bleach precursor dispersed in a water-soluble or water-dispersible matrix comprising an inorganic persalt bleaching agent and a solid base material which in the presence of water releases carbon dioxide or oxygen with effervescence. The composition provides improved cleansing and anti-bacterial activity together with excellent physical and in-use performance characteristics.
