Abstract (en)  
A method of manufacturing a work surface having at least one postformed edge, the method comprising the steps of: i) adhering a laminate to a core to form the actual work surface; ii) forming a groove in the underside of the core; iii) dispensing a curable synthetic material into the groove; iv) adhering the laminate around the postformed edge and onto the underside of the core so that it at least partially overlaps the groove; v) curing the synthetic material in the groove; and vi) forming a drip groove in the cured synthetic material. <IMAGE>
