Abstract (en)  
[origin: EP0707971A2] Printing to and MICR code reading from a cut-sheet form imprinted with an MICR code, such as personal checks, are continuously accomplished by means of a single apparatus, thereby simplifying processing and reducing the required installation space. A magnetic head (31) and a magnet (32) for reading the MICR code are disposed in a paper path (20) provided in a housing (11) of the printing apparatus. Any personal check (16) in paper path (20) is held by cut-sheet form loading rollers (23) and/or transportation rollers (29), which operate at a synchronized speed, and is passed over magnetic head (31) for MICR code reading. Thereafter, personal check (16) is held by loading rollers (23) and/or transportation rollers (29) for endorsement printing by a print head (13). <IMAGE>
