Abstract (en)
[origin: EP0709142A1] The equipment has at least one discharge-actuating mechanism (5), at least one medium outlet (8) and/or at least one indicator (10,20) for successive discharge operations. The actuating mechanism (11) for the latter is operated by an indexing mechanism (12), which can be set to any desired number of operating stages. The indicator can have a series of symbols or numbers in ascending or descending order, having a pointer working against a scale, the displayed symbol (22) being upright with the equipment in the horizontal discharge position.
