Abstract (en)

[origin: EP0709922A2] The contact member is stamped and bent from sheet metal into a shape having two sidewalls (3,4). The sidewalls form a U-section channel (2) with strip-like extensions (9,10). They are brought together above a similar extension (15) from the base (5) of the U. The pin (8) is supported by the extension (9) from one sidewall (3). The other extension (10) lies alongside it. The base extension (15) has a lateral projection from its extremity bent up around the other two extensions so as to exert pressure on the pin.
