Abstract (en)

[origin: WO9502957A1] A livestock identification device (10, 80) comprising a clamping means (12) having two substantially opposed arms (28, 82, 100) between or within which the median septum (66) of an animal's nose/muzzle (60) or the leg of an animal may be engaged and a mid-portion (18, 150) from which a tag means (14, 120) is at least in part substantially upstanding, the mid-portion (18, 150) proportioned at least in part to rest upon the animal's upper lip (72) or leg and ensure that the tag means (14, 120) is irretrievably locked in the mid-portion and is substantially upstanding for identification.
