Abstract (en)
The bag (1) has its contents attached to a series of supporting panels (2) which can be inserted or removed as required. Each panel has fastenings on one or both sides to hold implements such as instruments for school work or tools used by a particular trade or profession. One or more of the panels, made from a semi-rigid material, can be equipped with a series of detachable boxes and/or have a handle on its upper edge to facilitate removal. In addition there is a shock absorber between the rear panel and the back of the bag. The implement or tool fastenings can be of various types, including clips, hooks and Velcro (RTM) pads.

Abstract (fr)
Afin de pallier aux inconvénients rencontrés au transport et à l'utilisation d'objets divers (3,4) contenus dans un sac (1) non prévu explicitement à cet effet, il est proposé de regrouper ces objets sur un élément porteur (2,4) pouvant facilement être introduit ou extrait du sac. De cette manière, les objets ne risquent plus de s'abîmer lors de leur transport et sont facilement accessibles pour leur utilisation ou rangement. <IMAGE>
