Abstract (en)
[origin: EP0710463A1] Each connection (3) has a fixture (5) for attachment to a building wall (4), and a clip (6) with at least two arms (7) on the fixture. In their initial position, the inner space between the two clamp arms is less than the thickness of the partition (2) being clamped between the arms. The fixture has elongated holes (8) in for fastenings, especially screws. The fixture is in the form of a flat flange on whose surface facing away from the fixture side, the clamp arms are positioned, especially at right angles to the fixture plane.
