Abstract (en)

The invention concerns an apparatus (3) to be used as an aid for traffic when visibility is bad, consisting basically of a plurality of laser units (4) each emitting a beam of laser light at a frequency within the visible light spectrum and installed at regular intervals along at least one side (2) of a section of carriageway (1); the light from each laser unit (4) being emitted roughly in the direction of one of the other two nearest laser units. <IMAGE>
