Abstract (en)  
[origin: EP0710939A1] A small-sized alarm device (100) is hung on a doorknob to emit an alarm sound upon detecting that a human body contacts or approaches the doorknob. The alarm device (100) has data processing means, such as a calculator (101, 106, S717) and the like, in addition to an alarm means (101, 103, S705) and an electro-optic display (102) for displaying data processed by the data processing means and information related to the operation of the alarm means. To the alarm device is rotatably mounted a hanging member (421) for hanging the alarm device on a doorknob. The hanging member (421) is fit into the fitting (429) of the case (403) of the alarm device when in not use or is erected from the case (403) when the alarm device is hung on the doorknob. <IMAGE>
