Abstract (en)

[origin: WO9501778A1] A dietary fiber composition including a water-soluble fiber and a water-insoluble protein is provided. The water-insoluble protein provides an enteric-like coating for the water-soluble fiber without affecting the beneficial properties of the fiber. A process for preparing the composition and a method of use are also provided. A dietary fiber composition including a water-soluble fiber, a water-insoluble protein and an acidulant is provided. The dietary fiber composition can be used to preserve dehydrated or fresh fruits and vegetables by applying an aqueous solution of the composition to the produce. Alternatively, a solution of the dietary fiber composition can be frozen and the ice including the dietary fiber composition can be used to chill freshly caught fish or meat.
