Abstract (en)
[origin: EP0711524A1] The shower partition has a wall element (2) connected to a wall (12) by a console bracket (18) wherein at least one articulated joint is provided between console and wall element or complete wall. The articulated joint has a bearing block and a bearing element connected to it. The articulated joint (24,25) has a vertical axis and can be erected horizontal relative to the wall element or complete wall. The bearing block has an oblong hole which is mounted in a horizontal plane.
