Abstract (en)
A system for the incubation of sample liquids, consists of a rack (10) where incubation vessels (20) are located in holding plate (3) bore holes (12), an incubation block (1) with bore holes (2) for the vessels, and an arrangement for tempering the incubation block, which is thermally connected to the latter. The holding plate bore holes and the incubation block bore holes, are geometrically arranged so the incubation vessels of the rack fit into the incubation block bore holes.

Abstract (de)
Ein System zur Inkubation von Probenflüssigkeiten, bei dem Inkubationsgefäße mit Hilfe eines Racks in die Bohrungen eines Inkubationsblockes eingebracht werden. Das Rack besitzt Bohrungen, in welche die Inkubationsgefäße eingehängt sind. Die Bohrungen des Racks und die im Inkubationsblock sind so aufeinander abgestimmt, daß sich die Inkubationsgefäße in Bohrungen des Inkubationsblockes einpassen, wenn das Rack auf den Inkubationsblock gestellt wird. <IMAGE>
