Abstract (en)

A box for short-time storage and transportation of value deposits, for example bank-notes and items of value, comprises a collecting container (4) for value deposits supplied to the box, a device (8) arranged in connection with the collecting container (4) for providing a visible, permanent change of the value deposits positioned in the collecting container when the box is subjected to damages, and a feed-in device (10) for supplying value deposits to the collecting container (4). The feed-in device comprises a compartment (66) adjustable between a supply position and a discharge position, the compartment being in the supply position open towards the environments and closed towards the collecting container (4) and being in the discharge position closed towards the environments and open towards the collecting container (4).
