Abstract (en)
[origin: EP0712587A1] The sole (12) comprises a separate sole part adjustably mounted across the sole's lengthwise direction (16) and parallel to the sole's tread surface (17). The separate sole part is movably mounted on an axis (18) running at right angles to the sole's tread surface. The sole part incorporates the heel (15), middle (14) and or toe parts. The movably mounted sole part can be swivelled by a threaded spindle (21,22) extending parallel to the sole's tread surface and across the sole's lengthwise direction. The threaded spindle cooperates with a threaded element (23) in the movable sole part.
