Abstract (en)
The box is made from a blank (F1) comprising eight rectangular flaps (1 - 8), which form the box side walls, and completed by a rectangular fixing tongue (16). The flaps and tongue are joined together by parallel folding lines (9 -15,17). Four principal flaps (1,3,5,7) are separated by four identical intermediate flaps (2,4,6,8) of width (e) less than that (l) of opposite principal flaps (1,5). The other two principal flaps (3,7) have a width (L>l). The rectangular flaps all have the same height (h). Side assembly flaps (18.1,18.3,18.5,18.7), joined to the principal flaps by second folding lines (20.1,20.3,20.5,20.7) perpendicular to the first folding lines, form the box bottom. Two assembly flaps (18.1,18.5) are rectangular and have a width (l) equal to those of their associated principal flaps (1,5). The two other identical flaps (18.3,18.7) have a box length (L1) and a width (l1/2).

Abstract (fr)
- Caisse de matière en feuille, telle que carton ou carton ondulé, comportant des faces latérales carrées ou rectangulaires deux à deux reliées par une ligne de pliage, lesdites lignes de pliage étant parallèles entre elles. - Selon l'invention, une telle caisse comporte au moins cinq faces latérales. Elle peut être obtenue par enroulement d'un flan de matière en feuille autour d'un mandrin en coopération avec une plaque de pression dont le profil correspond à celui de deux ou trois faces consécutives dudit mandrin. <IMAGE>
