Abstract (en)
A device for removing dredging material from a water bed, comprising a rotatable cutting head (2) for cutting away the dredging material, and also conveyance means (4) for discharging the dredging material cut away, which conveyance means comprise a pump (5) which is connected to a pressure line. For complete removal of the dredging material cut away, the suction side of the pump is connected to a bucket (1), in which bucket the cutting head is situated. The suction connection of the pump also opens into the bucket.
