Abstract (en)

[origin: EP0713231A1] The control button includes a main pushbutton (14) which is associated with an auxiliary pushbutton (46) whereby the axis (19) of the mushroom head (16) is brought to bear upon it. For temporary cooperation with the catch (15), the main pushbutton has a projecting flange (52) at its top end with an edge (53) inclined at an angle to the axis of the assembly. The other edge (54) of the flange is at right angles to the axis and parallel to an edge (60) of a flange projecting from the lower end of the auxiliary pushbutton. A wing (64) of the sleeve (62) is visible through a window (65).
