Abstract (en)
[origin: WO9531260A1] An assembly (1) for use when skiing, particularly with the diagonal stride technique, including a ski (2) and members for increasing the bending stiffness of the ski (2) to maintain or increase the upward motion of the underside (7) of the ski (2), at least in one part of the purchase area (10), when the heel of the foot is lowered. Said members particularly include a plate (3) placed over the top surface (6) and held in place by means of fastening elements (4, 5).
